

Ditch Witch C24X Walk-Behind Trencher

C24X WALK-BEHIND TRENCHER

Maximize performance and your return on investment with the Ditch Witch C24X Walk-Behind Trencher. Our exclusive CX Track design delivers better traction and maneuverability in a more compact design for tighter jobsites. Responsive, easy-to-use touch controls provide smoother operation. And superior serviceability—a simple, open design for easy access and no daily grease points to worry about—means less maintenance time to keep your C24X rental-ready. Get proven Ditch Witch reliability in the latest, patent-pending track design: only with the C24X.

SPECIFICATIONS

DIMENSIONS	Trench depth, maximum:	36 in
OPERATION	Trench width, maximum:	6 in
POWER	Width:	35.8 in
POWER TRAIN	CL to Right:	18.6 in
	CL to Left:	17.2 in
HYDRAULIC SYSTEM	Headshaft:	13.7 in
	Length (Up to):	101 in
FLUID CAPACITIES	Height - transport (Up to):	75 in

KEY FEATURES

- Reliable 24-hp Honda® engine keeps the C24X performing for rental income you can count on, year after year.
- Up to 36" digging depth for efficient installation of pipe and cable.
- Newly designed hydraulic system eliminates vertical shafts and belts, resulting in a simple, reliable unit with no linkages to adjust.
- Utilizes the Ditch Witch 35K digging system or the **new OptiCut™ system**—both specifically designed to work with Ditch Witch trenchers to optimize production.
- Exclusive, patent-pending CX Track design puts more track on the ground for better traction while increasing stability for better production.
- The shorter left track on the CX Track design allows for a more compact piece of equipment than competitive designs, offering more maneuverability in tighter spaces.
- New, robust, straightforward pivot design is maintenance-free and increases unit uptime.
- Greaseless sealed bearing design with construction-grade seals help increase machine longevity.
- No daily grease points—a Ditch Witch exclusive—means less hassle and prep to keep your trenchers rental-ready.
- Standard outboard bearing support stabilizes the headshaft and auger, for reliable productivity trench after trench.
- Hydrostatic, skid-steer style steering provides easier operation.
- Redesigned easy-touch controls are smoother and lighter for less operator fatigue and increased machine responsiveness.
- Increased visibility of the workstation improves operator productivity.
- The RotoWitch® boring attachment results in fewer disturbances, less labor and less restoration than tearing up driveways and sidewalks to complete an installation.
- Our easy-to-operate backfill blade is much faster and less expensive than shovels, increasing productivity and rental revenue.
- Ditch Witch also offers the S2B Trailer, a single-axle design with a full-width steel deck, with ramps for easy loading and unloading of equipment of up to 5,700 lb.
