# Description

The Heli 5000LB cushion forklift is perfect for warehouse jobs. A small turning radius and fast lifting speed makes it flexible and easy to use. A load sensing hydraulic system reduces energy consumption and the fully enclosed dashboard and lowering damping device inside the lifting system reduces mast shock and vibration.

## DIMENSIONS

- **Overall Height (overhead guard):** 83 in.
- **Overall Length (with/without fork):** 136.8/94.5 in.
- **Overall Width:**42 in.
- **Minimum Turning Radius:** 78.7 in.
- **Weight:** 9,480 lbs

## PERFORMANCE

- **Max Travel Speed:** 10.8 mph
- **Engine:** Kubota WG2503
- **Engine Rated Power:** GAS:57.4 hp/2600 rpm
- **Engine Rated Torque:**GAS:128.7 ft lb/1400 rpm

## FEATURES

- **Rated Capacity:** 5,000 lbs
- **Load Center:** 24 in.
- **Workspace:** Semi-suspension seat, small steering wheel and electro-hydraulic direction changing
- **Working Efficiency:** Small turning radius and fast lifting speed
- **Energy Efficiency:**load sensing hydraulic system and fully electric control engine
- **Maintainability:** Engine hood open angle increased to 80° and small front floor board
- **Vibration:** Cushion connection and whole suspension cab
- **Noise:** Fully enclosed dashboard and lowering damping device inside the lifting system
